

outlast
built to endure

A manufacturing and development company providing products that last.

ONE STOP FACTORY

MANUFACTURE

We are the factory and you will be working directly with us. No extra layers and no hidden unknown results.

DEVELOPMENT

Our USA and China development team work directly with you to make sure the final result aligns with your business goals.

DESIGN

Whether you're starting from scratch or building to spec Outlast's designers will help bring your project to life.

MANUFACTURING

CLEAN.
EXPERIENCED.
TRANSPARENT.

We know that being a great manufacturing partner requires clean facilities and operations, experienced staff, and transparent communication. This is our business and we strive to keep these values in all that we do.

Details: TPU and Nylon
Cooler Handbag

EXO F6

Details: TPU Expanded
Roll Top Backpack

Spent a week at the beach, this cooler really held. The outlast team does a great job with our product and we are happy to be working with them. I still think it is over priced but so far its been worth the premium price.

JULIA KING

The outlast design team is top notch. They are good a presenting ideas and verbalizing solutions. This combined with excellent visualization abilities makes them a great support team. They are an asset to any company, project or team that the works with.

IVAN LUCCION

I have shared Outlast with a few of my professional colleges. I have expressed how great hey are to work with, they are open to suggestions, and provide really good feedback and guidance for what is and is not achievable.

NEAL EATON

DEVELOPMENT+DESIGN

Our expertise branches out to many other industries. At our core we are a Manufacturing and Development Partner thats why we also provide development and design service along with our manufacturing.

We know that as a factory we need to keep expanding our services to stay ahead of our competitors.
